

Childrens Immunizations - Health Dept.

The goal of this program is to protect children early in life by immunizing them against vaccine-preventable diseases. Routine childhood immunizations are free for any child through age 18, regardless of family income. Some vaccines (shots) need to be given more than once to protect your child.

Shots are free for children age 4 weeks through age 18 years. There is no appointment necessary. The office hours are Monday through Friday 8am to 5 pm except on the 4th Friday.

Please see [website](#) for further information.

The role of public health is to promote and protect the health and safety of all Floridians.

This is done by:

- detecting, investigating, and preventing the spread of disease;
- ensuring that health care practitioners meet the requirements for providing adequate care;
- identifying health risks in the community;
- informing the public on health issues;
- maintaining a safe and healthful environment;
- promoting healthy lifestyles;
- providing primary care for individuals with limited access to such care from the private sector;
