

Early Steps Early Programs- Johns Hopkins All Children's Specialty Care

This program offers help for children from birth to age 3 who may have developmental delays. Families, doctors, or local agencies can refer children to the program if they are concerned about a child's development.

Early Steps services are based on what the family needs and wants, as well as the results of evaluations. Most services involve home visits to help the child get the care they need.

Please call or visit the [website](#) for more information.
